Research Methods In Kinesiology And The Health Sciences
Synopsis
Wolters Kluwer Health is pleased to introduce this innovative first edition by acclaimed authors Susan Hall and Nancy Getchell aimed at helping students learn vital research skills in an accessible manner. Designed for introductory research methods courses at the beginning graduate and undergraduate levels, Research Methods in Kinesiology includes all major topics conventionally addressed in introductory research methods texts. Taking a practical approach, this book focuses on topics directly related to development of research proposals, since these topics are most relevant to beginning researchers. With unique chapters on research writing style and matching statistical tools with research protocols, readers will find this book written in a conversational tone intended to make the topic more readily understood by today’s student. Problem-based learning activities help students apply the skills they’ve learned and prepare for actual research. An online suite of ancillaries rounds out this book and provides instructors with additional support in teaching this critical topic.
